PROFESSIONAL SUMMARY

Computer Engineering graduate (GPA 4.03/5) targeting entry-level AI/ML engineering. Developed image-based vehicle recognition for SAER (94.58% historical test Top-1) and trained a Random Forest classifier for a graduation team project (0.97 macro-F1 in a six-class historical test). Completed Olo Academy's 200-hour AI Engineering Bootcamp in collaboration with MCIT.

TECHNICAL SKILLS

ML & Vision: Python, scikit-learn, Random Forest, regression, model evaluation, DINOv2, CLIP
Data & Workflow: Pandas, NumPy, preprocessing, feature engineering, Git, SQL, Jupyter
Application tools: FastAPI, React, TypeScript (used across team projects)

SELECTED PROJECTS

SAER — Used-Car Pricing & Recognition | Olo Academy capstone · Team project 2026

- Prepared 2,742 vehicle listings and 13,416 images using listing-group data splits; developed DINOv2 + CLIP make/model recognition (94.58% Top-1, historical test).
- Contributed to a team-built Arabic React/TypeScript + FastAPI platform with separate price models; the specification-price HistGradientBoostingRegressor reported R^2 0.875 and MAE ~SAR 13,089.

AI-Enhanced Intrusion Detection System | University graduation · Team project 2025–2026

- Trained a Random Forest classifier on CICIDS2017 network-flow data (2.83M records, 78 features).
- Evaluated the historical six-class notebook on 566,149 test samples (macro-F1 0.97); the team presented classification and risk scoring in a Flask dashboard.

GitHub repository | Model results

EXPERIENCE

Cooperative Training Student | Saudi Energy Company · Abha Jun–Aug 2024

- Resolved 5+ weekly IT support tickets and maintained 25+ end-user devices under team supervision.
- Monitored 3 internal servers under supervision and documented 7 recurring support procedures.

EDUCATION & TRAINING

B.Sc. in Computer Engineering | King Khalid University · GPA 4.03/5 2026

AI Engineering Bootcamp (AIEP) | Olo Academy · 200 hours Sep–Nov 2026

In collaboration with MCIT under the Saifak Zaki initiative; coursework in ML, computer vision, deep learning, LLMs and RAG.
