PROFESSIONAL SUMMARY

Computer Engineering graduate (GPA: 4.03/5.00) targeting entry-level AI/ML and computer vision roles. Built a vehicle recognition model and trained a network traffic classifier in team projects. Completed Olo Academy's 200-hour AI Engineering Bootcamp in collaboration with MCIT.

TECHNICAL SKILLS

ML & Computer Vision: Python, scikit-learn, Random Forest, regression, model evaluation, DINOv2, CLIP
Data & Workflow: pandas, NumPy, data preprocessing, feature engineering, SQL, Jupyter, Git

SELECTED PROJECTS

SAER - AI-Powered Car Pricing & Recognition | Olo Academy capstone · Team project 2026

- Prepared 2,742 vehicle listings and 13,416 images, grouping images by listing when splitting the data to reduce leakage risk.
- Developed a DINOv2 + CLIP classifier for vehicle make and model recognition, reaching **94.58% top-1 accuracy** across 59 classes.
- **Team project stack:** FastAPI, React, TypeScript.

github.com/rayan-qh/saer | Live demo

AI-Enhanced Intrusion Detection System | University capstone · Team project 2025–2026

- Trained a Random Forest classifier on the training portion of CICIDS2017 (2.83M total network-flow records, 78 features).
- Recorded **0.97 macro-F1** across six classes in the notebook experiment, using a stratified 20% test split (566,149 records).

EXPERIENCE

Cooperative Training Student | Saudi Energy Company · Abha Jun–Aug 2024

- Resolved 5+ IT support tickets per week and maintained 25+ end-user devices.
- Monitored 3 internal servers under supervision and documented 7 recurring support procedures.

EDUCATION & TRAINING

B.Sc. in Computer Engineering | King Khalid University · GPA 4.03/5 2026

AI Engineering Bootcamp (AIEP) | Olo Academy · 200 hours Sep–Nov 2026

In collaboration with MCIT under the Saifak Zaki initiative; coursework in ML, computer vision, deep learning, LLMs and RAG.
